Welcome to NexAlliance

At NexAlliance, we help businesses build their legacy through technology.

We don't just develop software—we partner with businesses to streamline operations, automate workflows, and build scalable digital ecosystems that enable organizations to grow efficiently. By combining innovation, transparency, uncompromising quality, and long-term support, we empower businesses to embrace digital transformation, improve productivity, generate employment, and create lasting business value.

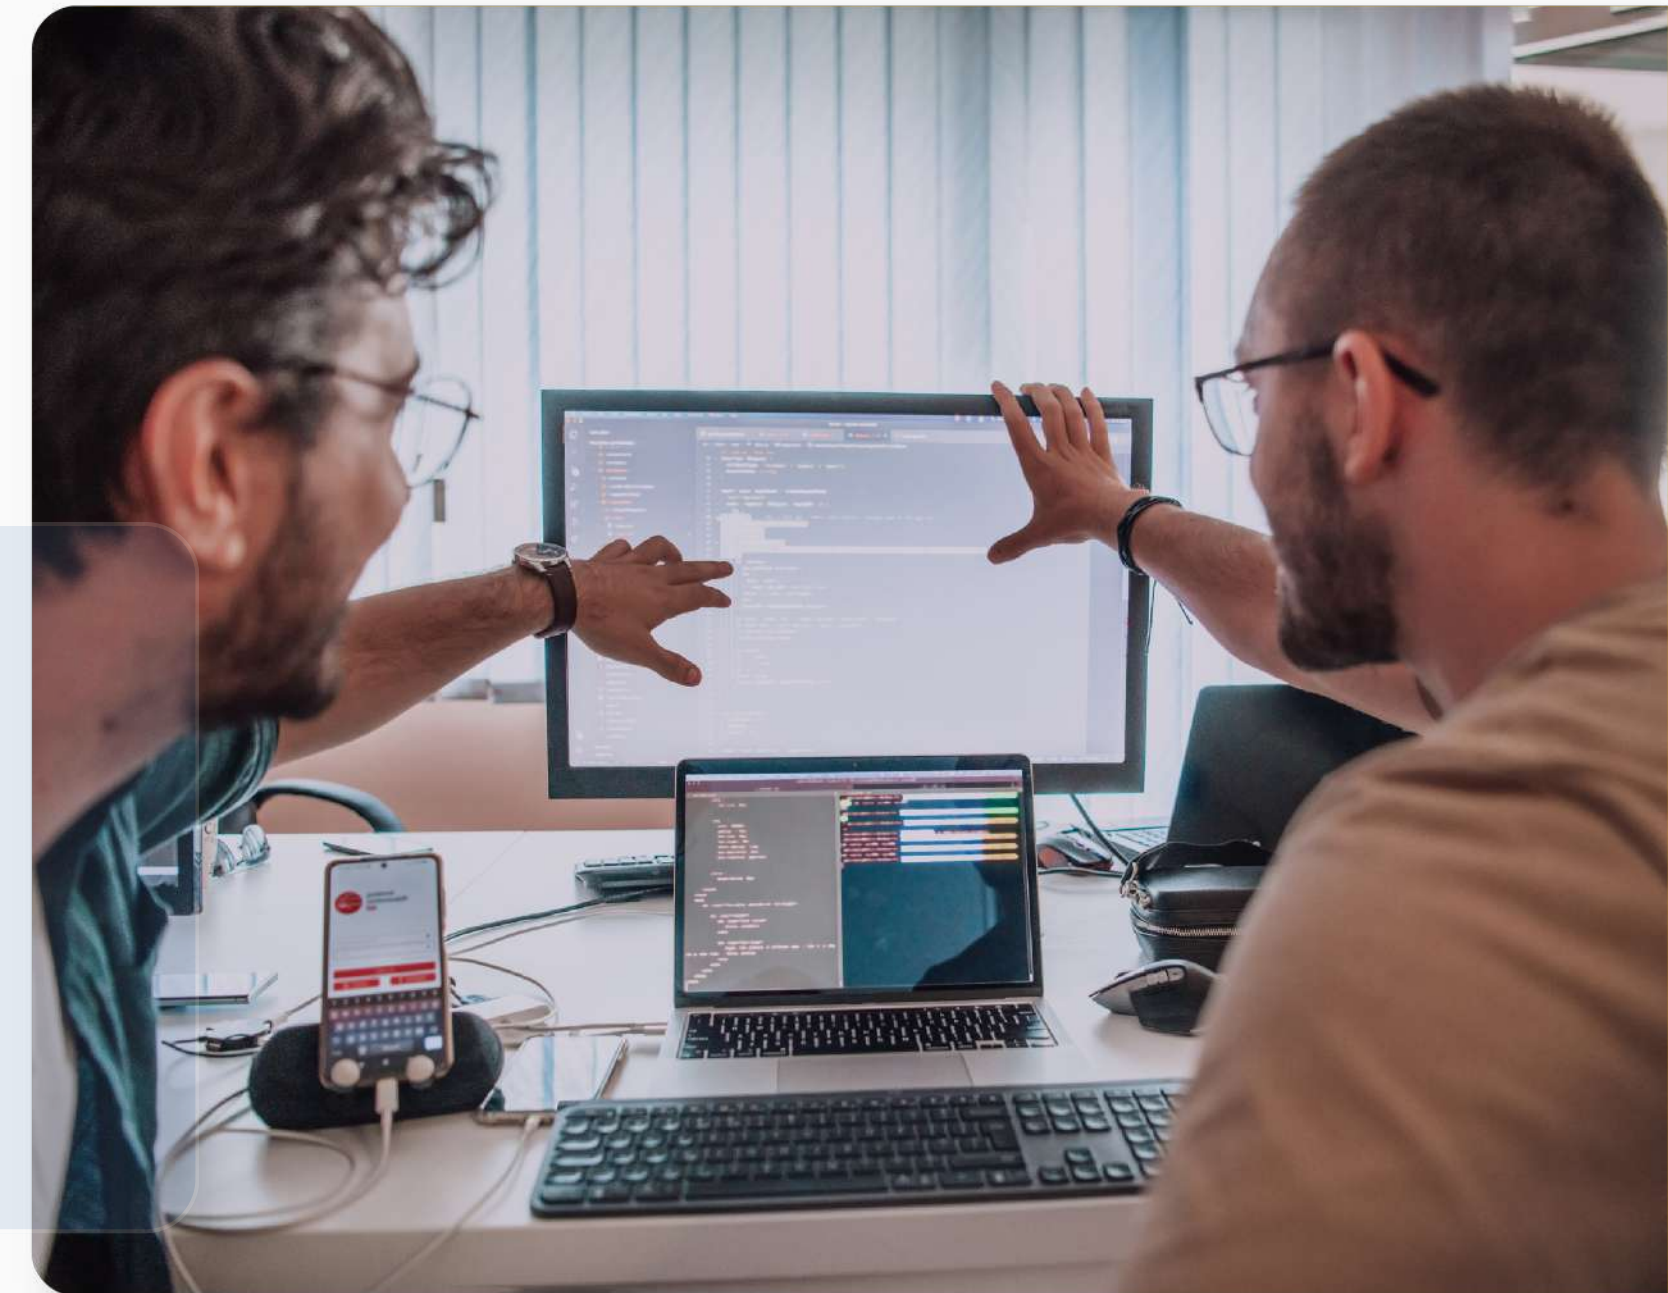

Introduction

Our expertise includes ERP systems, CRM solutions, web and mobile applications, workflow automation, AI-integrated solutions, management platforms, and industry-specific software tailored to each organization's unique requirements.

We are NexAlliance, specializing in custom software solutions built on Lean Management principles. We first understand your complete business workflow, identify inefficiencies, eliminate unnecessary processes, and then develop technology that simplifies operations, improves productivity, and supports long-term business growth.

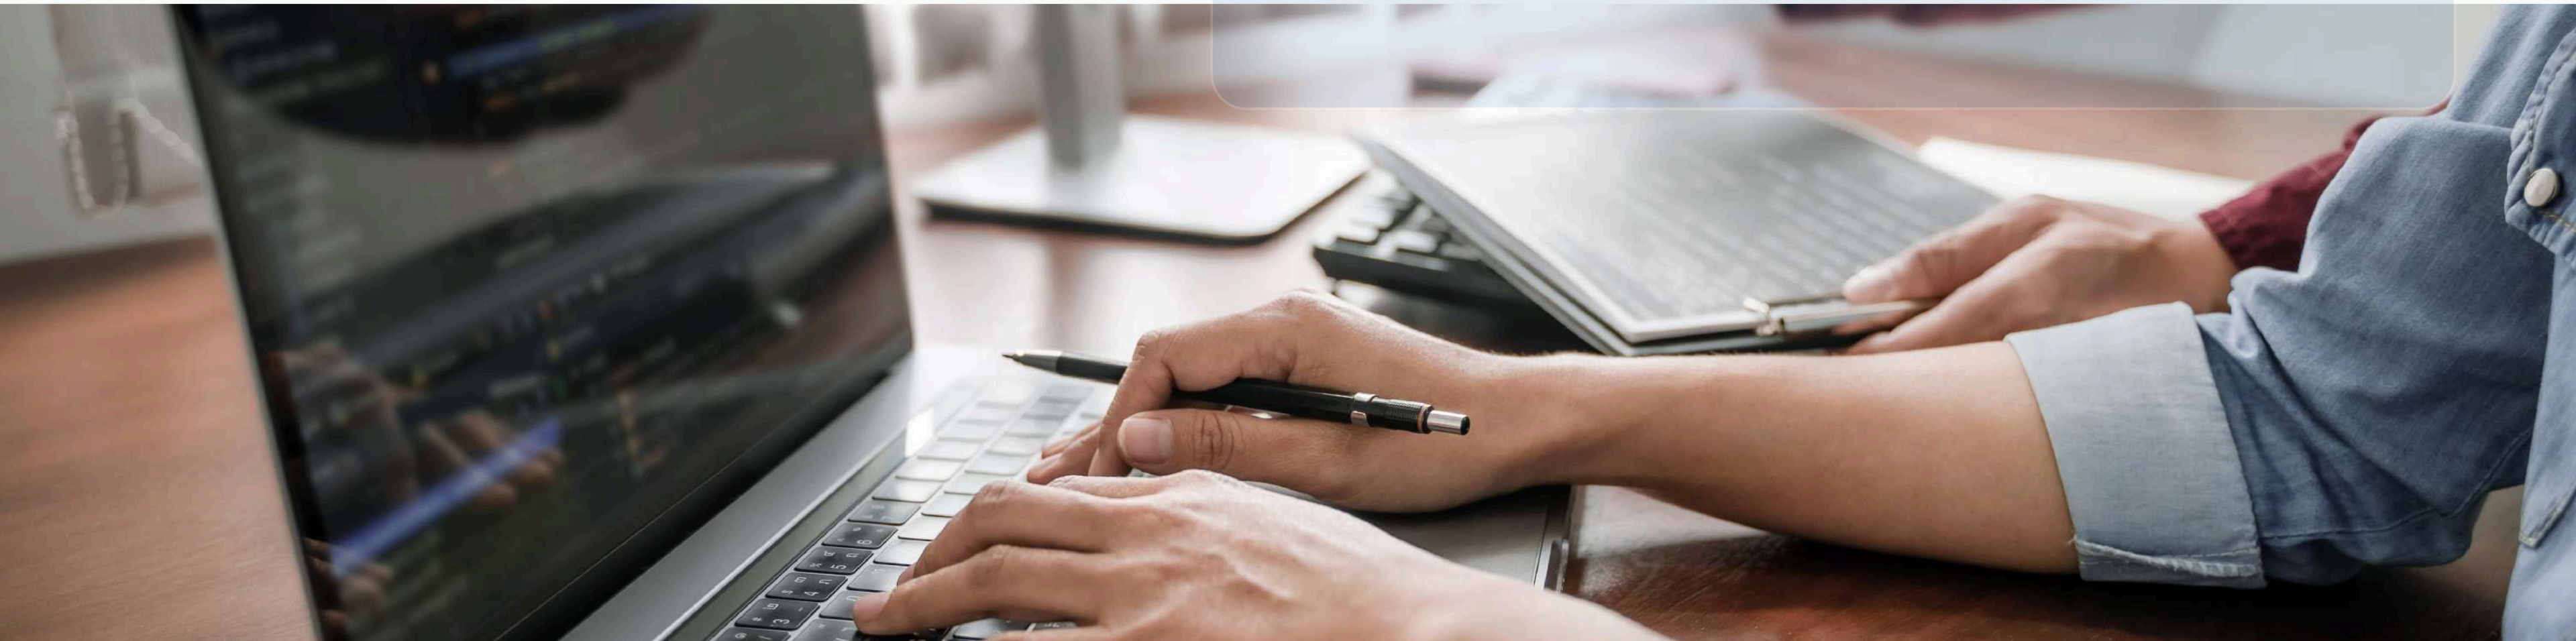

Every solution is built based on real business workflow and challenges.

Why NexAlliance?

NexAlliance exists to help businesses build their legacy through technology.

Every business operates differently, which is why we never believe in one-size-fits-all software. We take the time to understand your processes, challenges, and goals before designing solutions that align with your operations. Our focus is on creating secure, scalable, and future-ready software that improves efficiency, supports informed decision-making, and delivers measurable business outcomes.

NexAlliance

Satisfaction

Our Mission

Our mission is to design, develop, and deliver innovative software solutions that solve real business challenges through deep research, customization, and advanced technology.

We are committed to:

- Delivering scalable and future-ready digital solutions.
- Building software with complete transparency and uncompromising quality.
- Understanding every client's unique business workflow before development.
- Driving innovation through continuous research and next-generation technologies.
- Creating long-term partnerships that help businesses grow with confidence.
- Developing reliable systems that improve productivity, efficiency, and business performance.

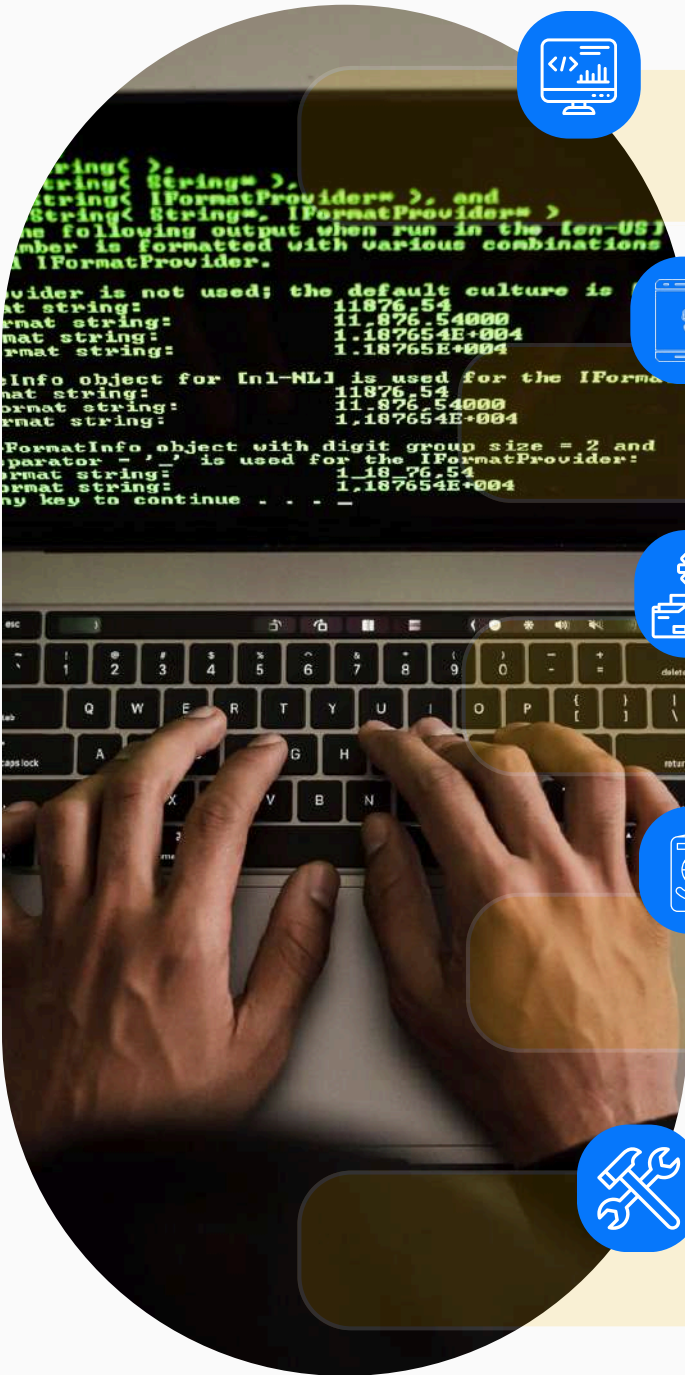

We are committed to building reliable, scalable, and user-friendly systems that help businesses operate smarter and grow faster.

Business Process Automation

ERP & CRM Solutions

Transforming ideas into scalable digital solutions.

Hotel Hilton TMS

Problem Statement: Hotel staff managed tasks through WhatsApp, making it difficult to track assignments, monitor completion status, and identify department-wise workload.

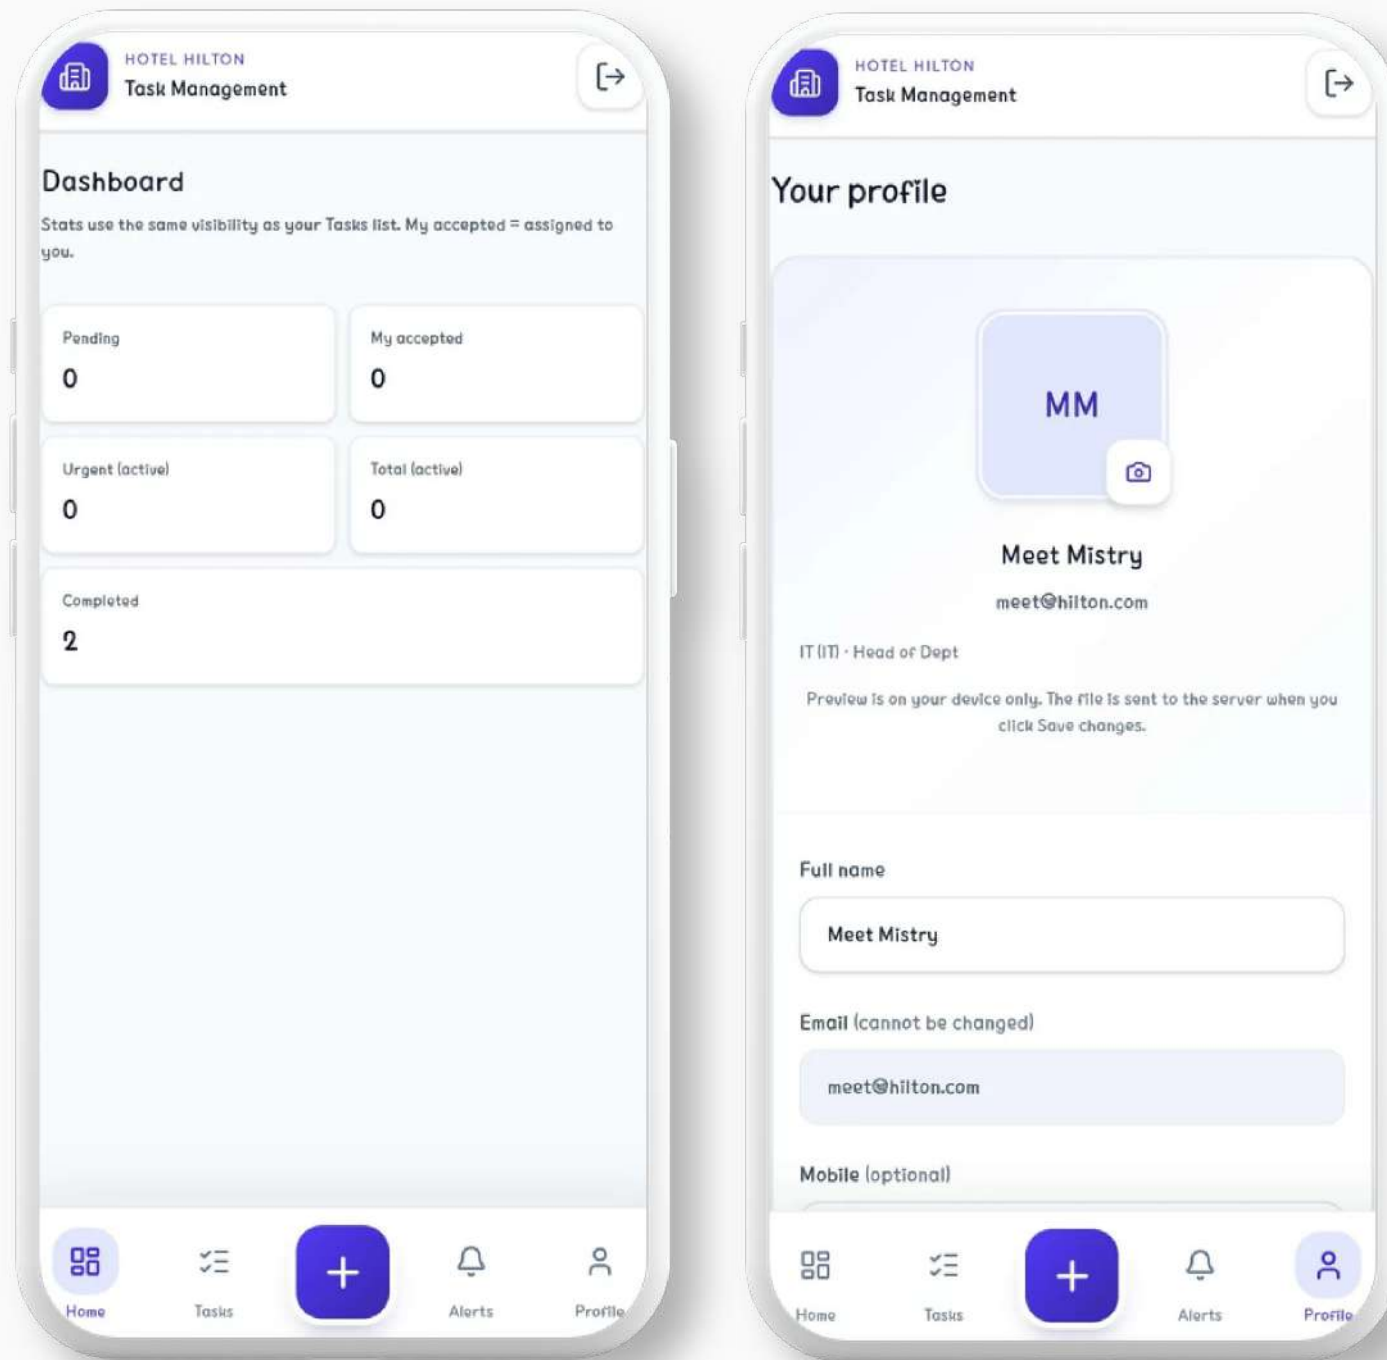

Identification

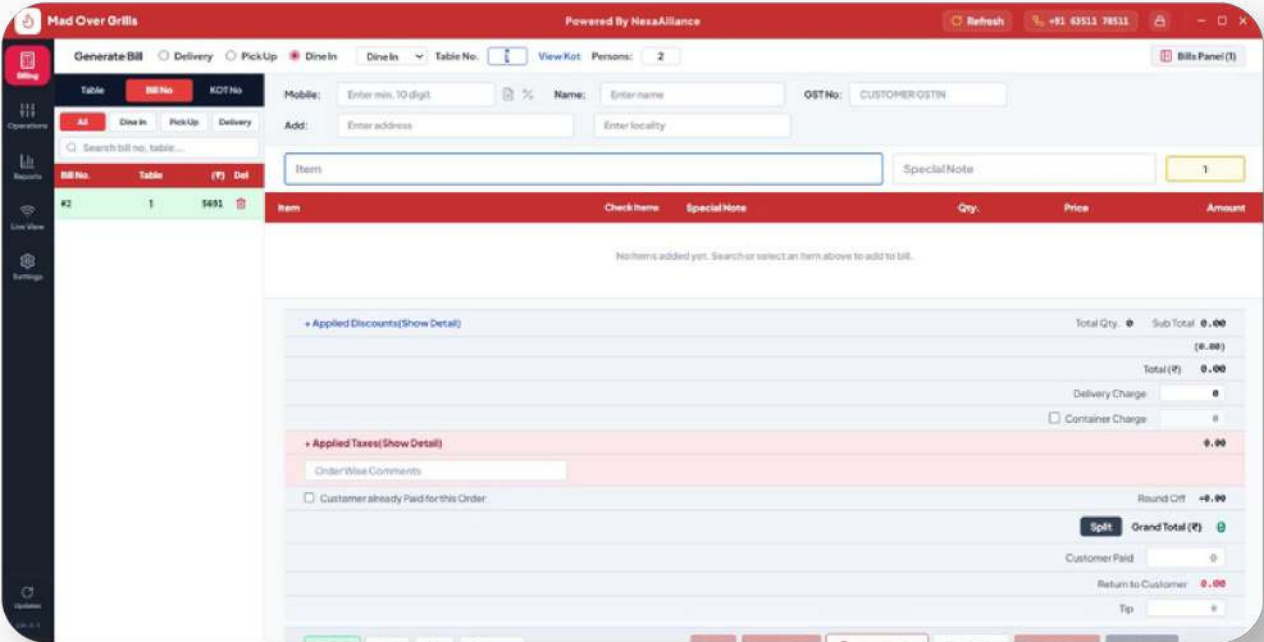

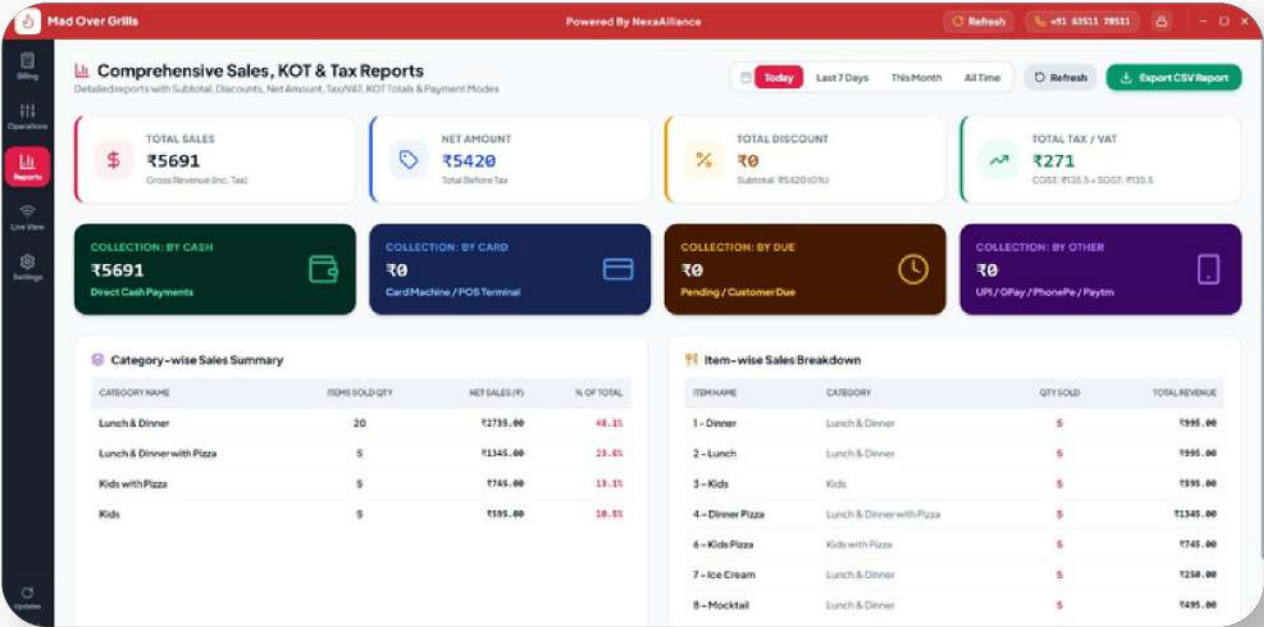

- No centralized task tracking.
- Difficult to monitor task completion.
- No department-wise workload visibility.
- Poor communication and accountability.

Solution

- Analytics Dashboard
- Task Assignment System
- Role-Based Access Control
- Task Notifications

Improved task visibility, accountability, and operational efficiency across all hotel departments.

Mad Over Grills MS

Problem Statement: The restaurant relied on third-party billing software, creating concerns over data security and limited operational control.

Identification

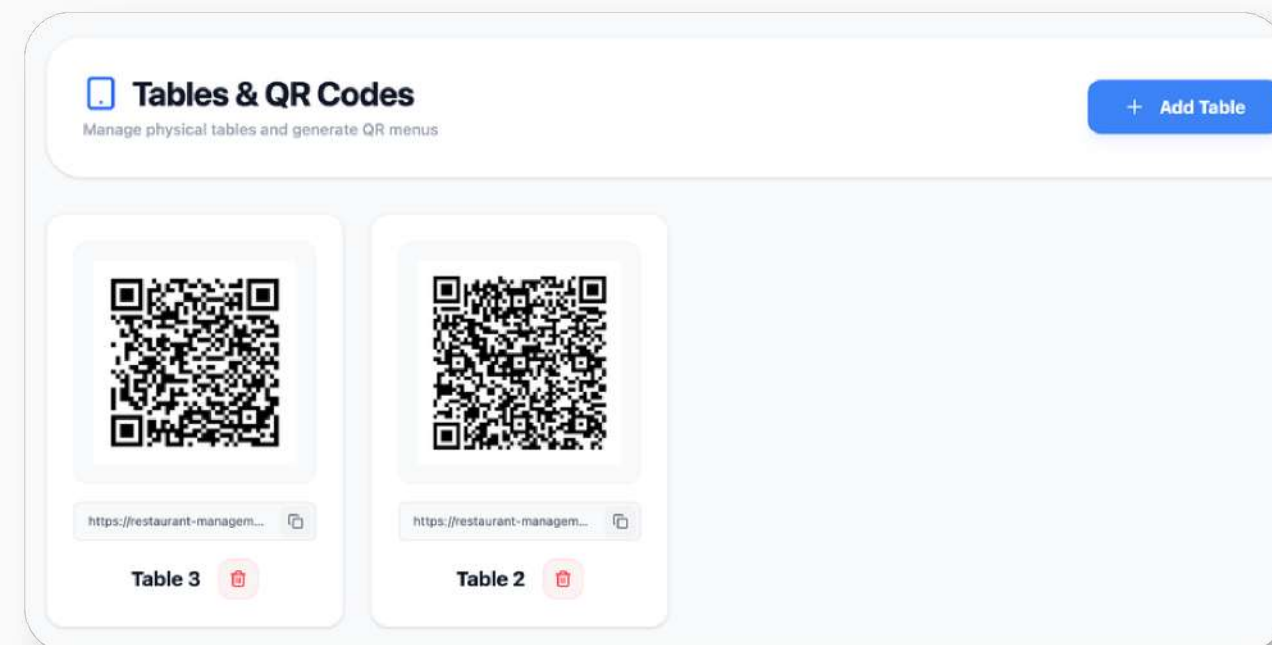

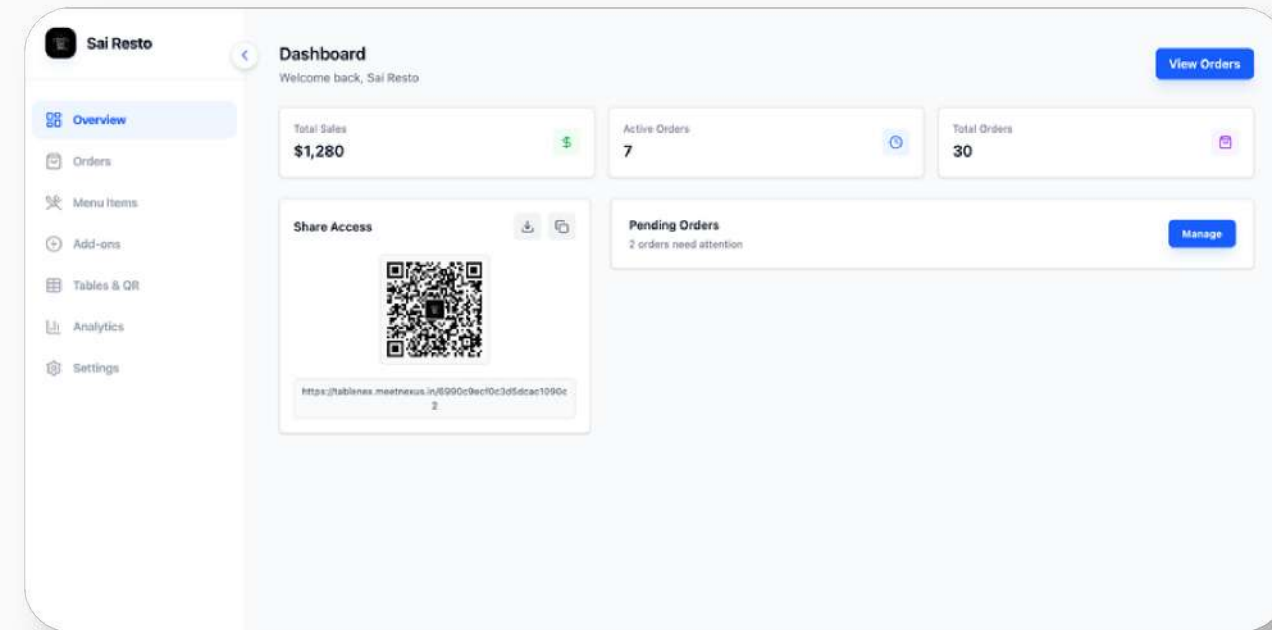

- Risk of customer and business data leakage.
- Dependency on third-party software.
- Limited customization.
- Lack of centralized billing management.

Solution

- Smart & Secure Billing Management
- Automated GST Calculation
- Multiple Payment Methods
- Sales & Analytics Reports

Delivered a secure offline billing solution with complete control over restaurant operations and business data.

Custom Restaurant System

Problem Statement: Restaurants struggle to manage billing, table operations, and customer orders efficiently using disconnected or manual processes. This leads to billing errors, slower service, and limited operational insights.

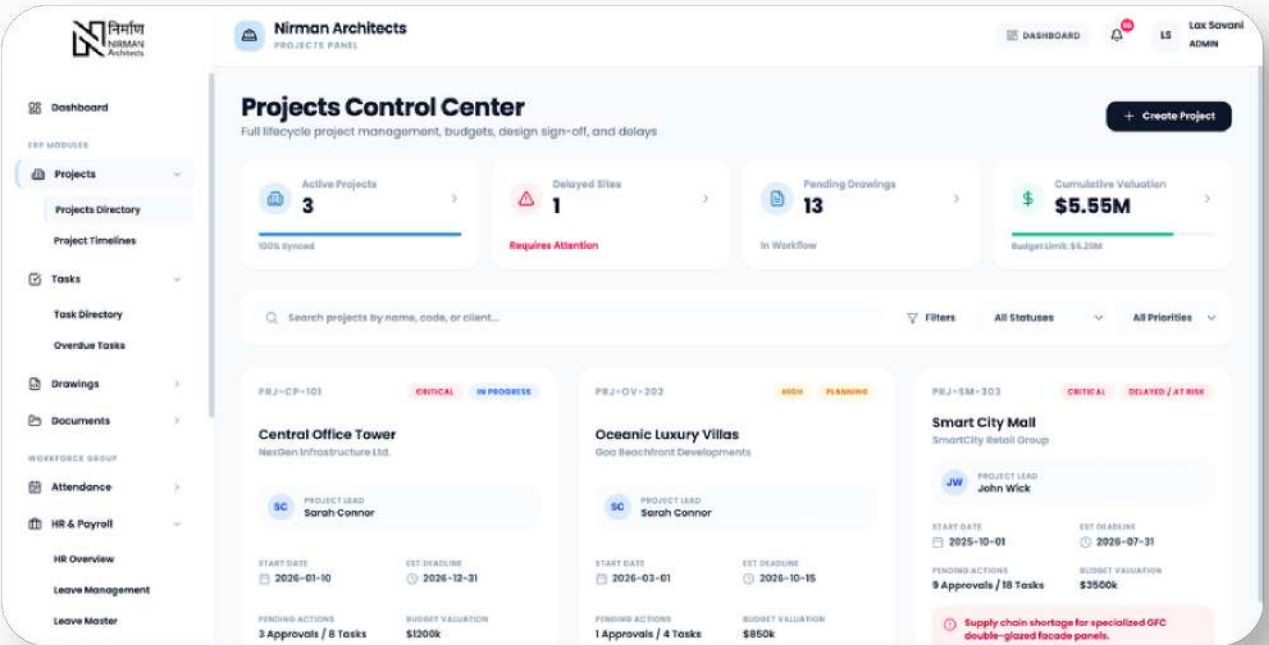

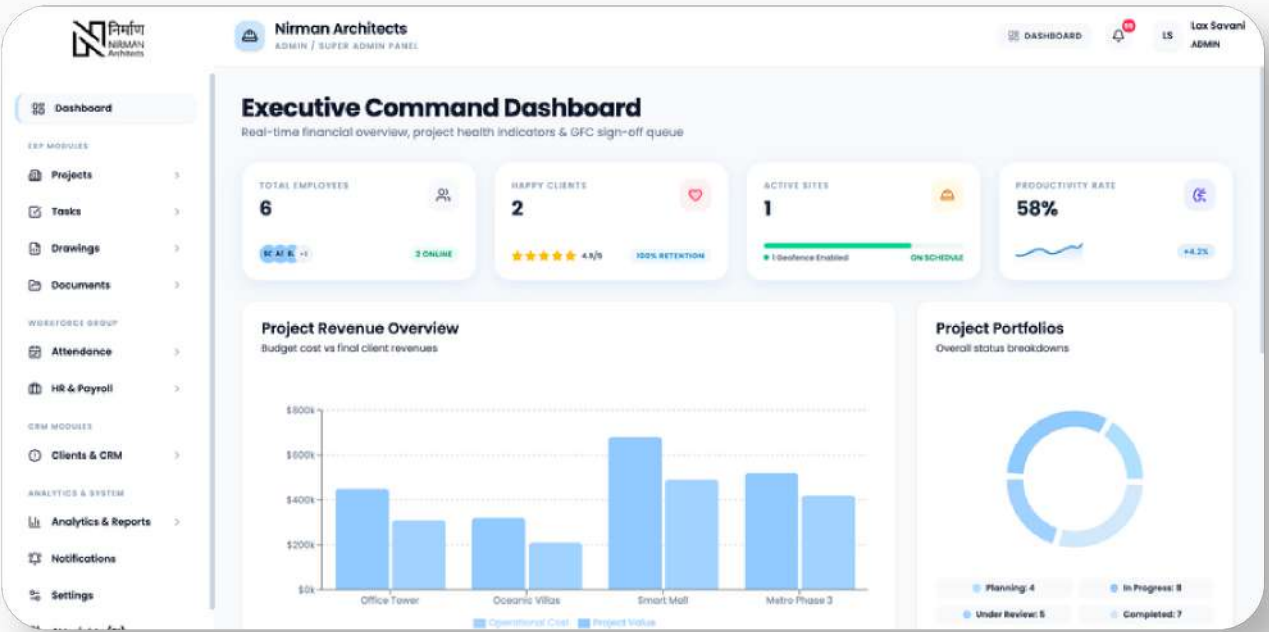

Identification

- Manual billing and order processing
- Poor table management
- Limited business reporting
- Lack of brand customization

Solution

- POS Billing System
- Order & Table Management
- Reports & Analytics
- Custom Branding Support

Simplified restaurant operations with faster billing, streamlined order management, and improved operational efficiency.

Nirman Architects MS

Problem Statement: Architectural firms often rely on multiple tools to manage projects, drawings, employees, and client communication, resulting in fragmented workflows and reduced team productivity.

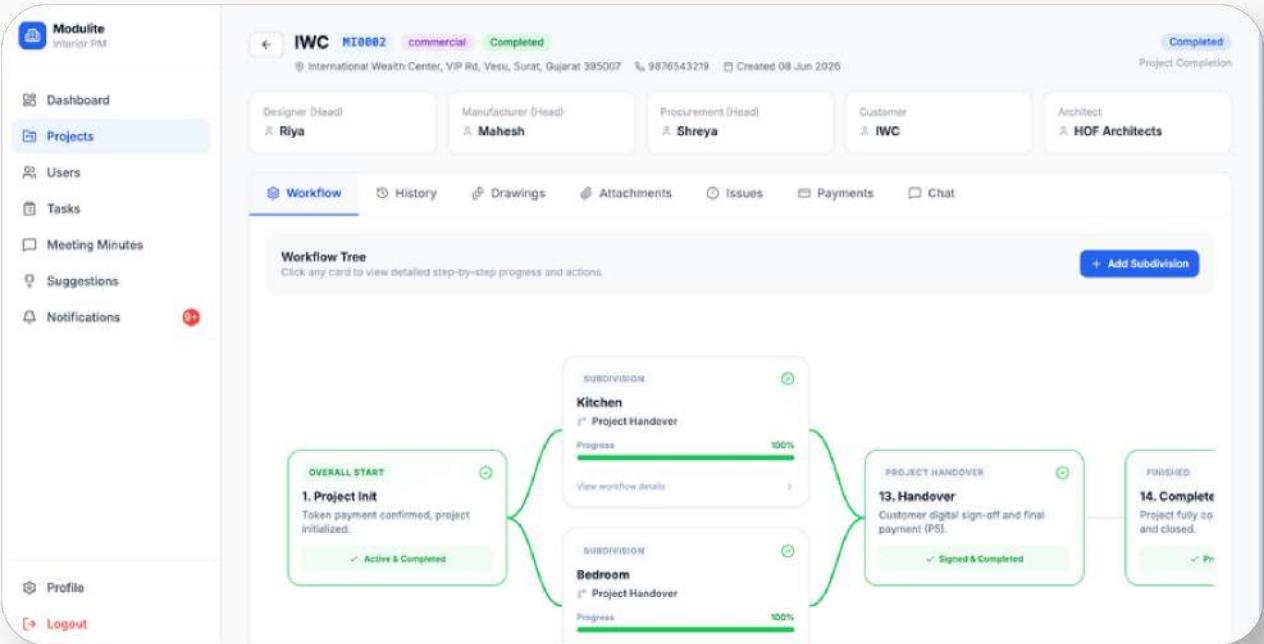

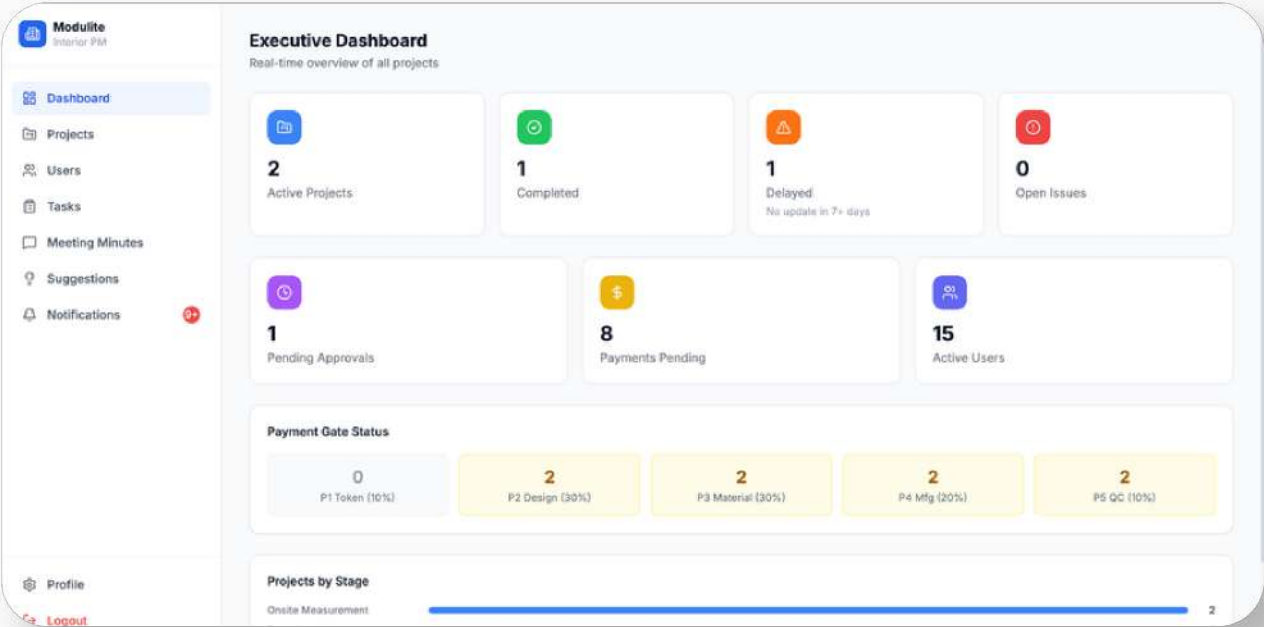

Identification

- Disconnected project management
- Difficult drawing version control
- Limited team productivity tracking
- Inefficient client collaboration

Solution

- Project & Task Management
- Drawing Management & Version Control
- Employee Attendance & Productivity Tracking
- Customer Portal & Analytics Dashboard

Centralized project execution, improved collaboration, and enhanced visibility across architectural operations.

Modulite Interior

Problem Statement: Managing multiple interior projects, site activities, and team coordination manually makes it difficult to track progress, meet timelines, and maintain project documentation.

Identification

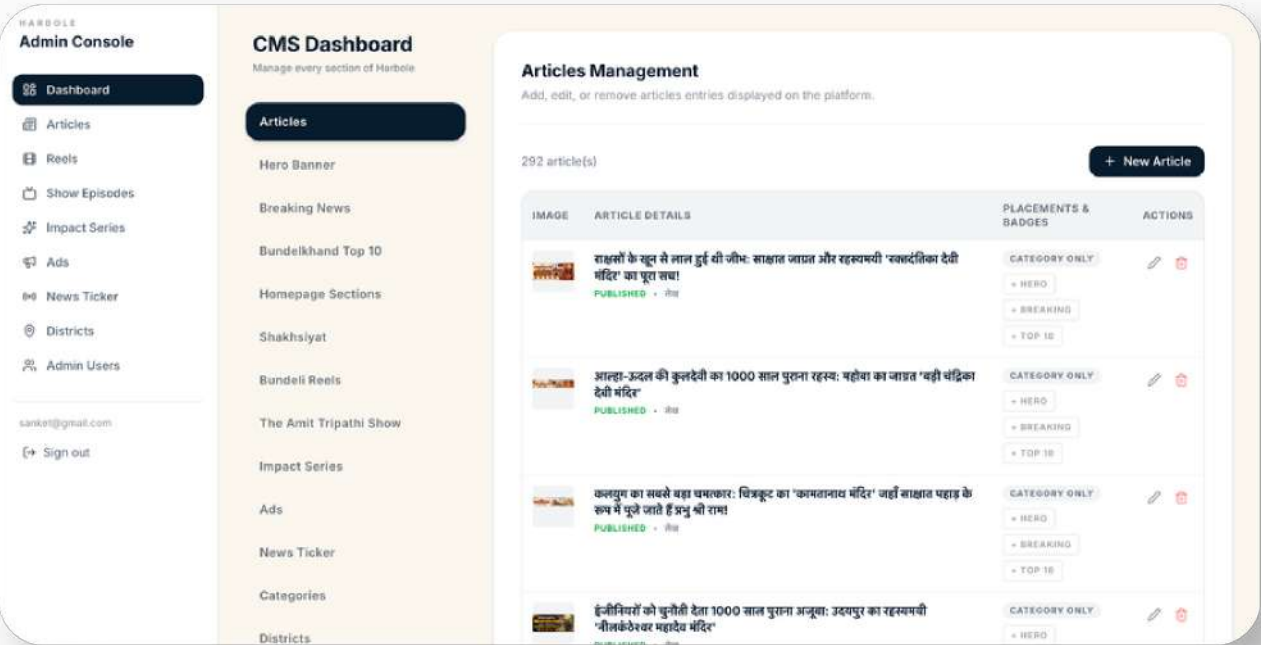

- Lack of centralized project tracking
- Difficult site and task coordination
- Poor progress visibility
- Inconsistent project documentation

Solution

- Project & Site Management
- Task Assignment & Progress Monitoring
- Timeline Management
- Reports & Project Documentation

Improved project visibility, streamlined execution, and better coordination across interior projects.

Har Bole – News Platform

Problem Statement: Managing news content, reporters, and breaking updates manually delayed publishing and made it difficult to deliver timely, organized news across digital channels.

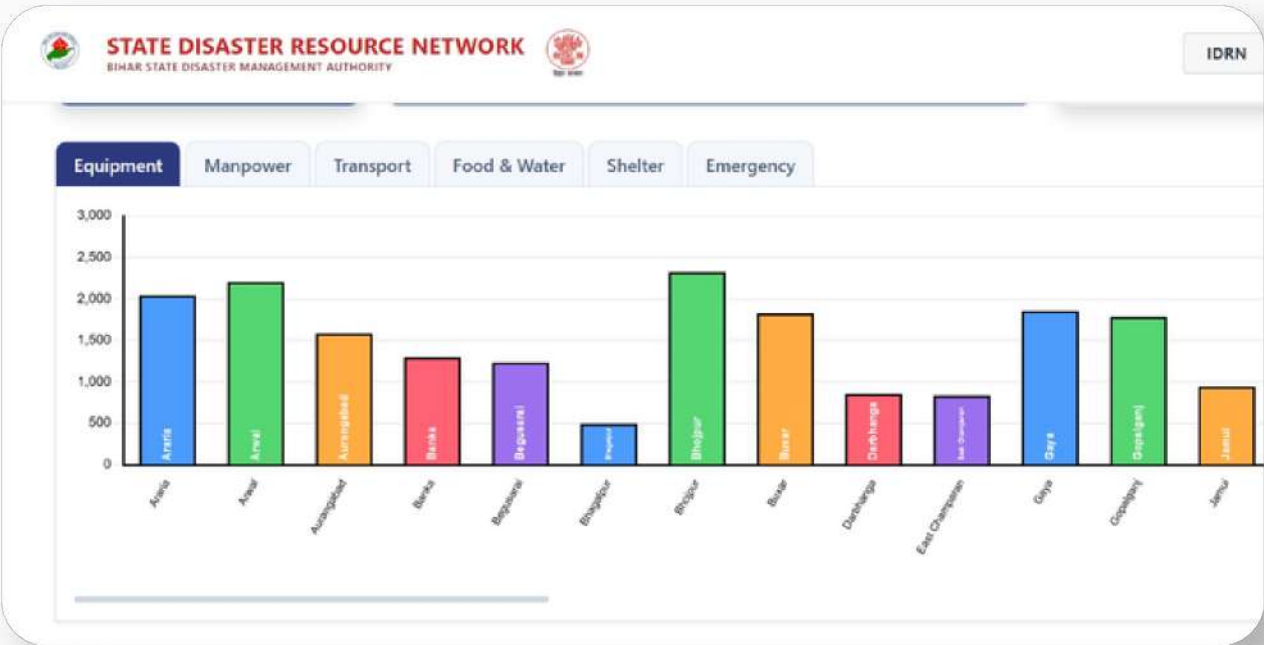

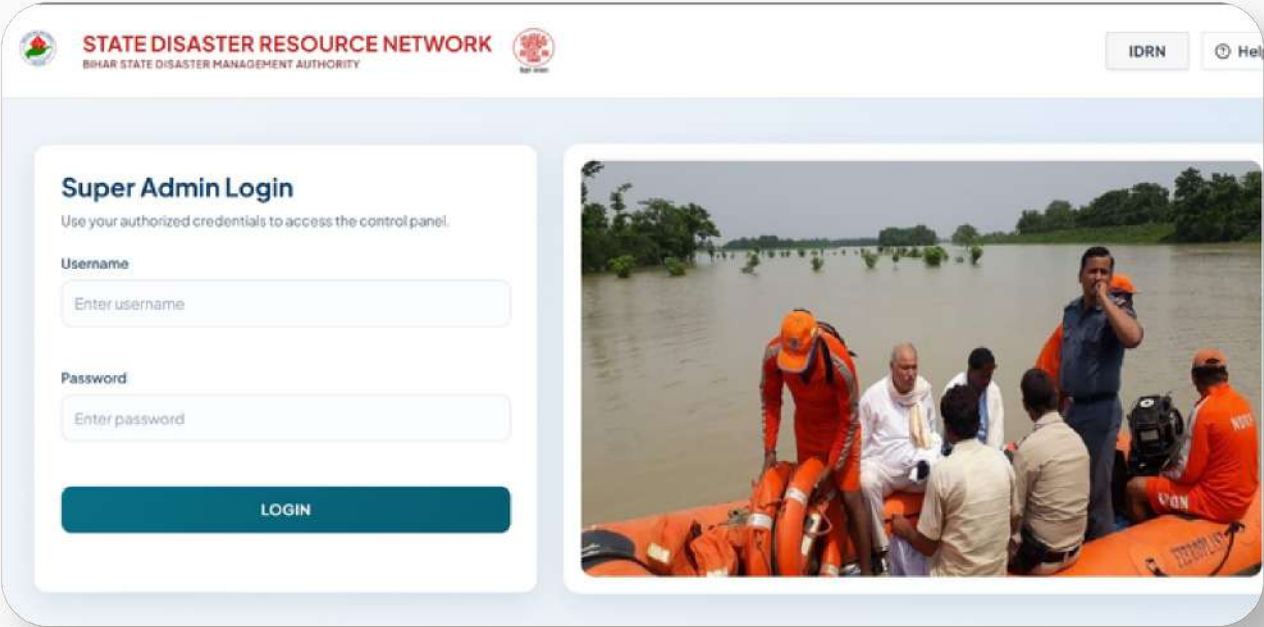

Identification

- Slow content publishing process
- Difficult reporter and author management
- Unorganized news categorization
- Limited audience reach and engagement

Solution

- News Article & Category Management
- Breaking News Publishing
- Reporter & Author Management
- Advertisement & Social Media Integration

Enabled faster news publishing, streamlined content management, and increased audience engagement.

BDSRN

Problem Statement: Emergency teams lacked a centralized system to report incidents, coordinate resources, and monitor disaster response, resulting in delayed decision-making during critical situations.

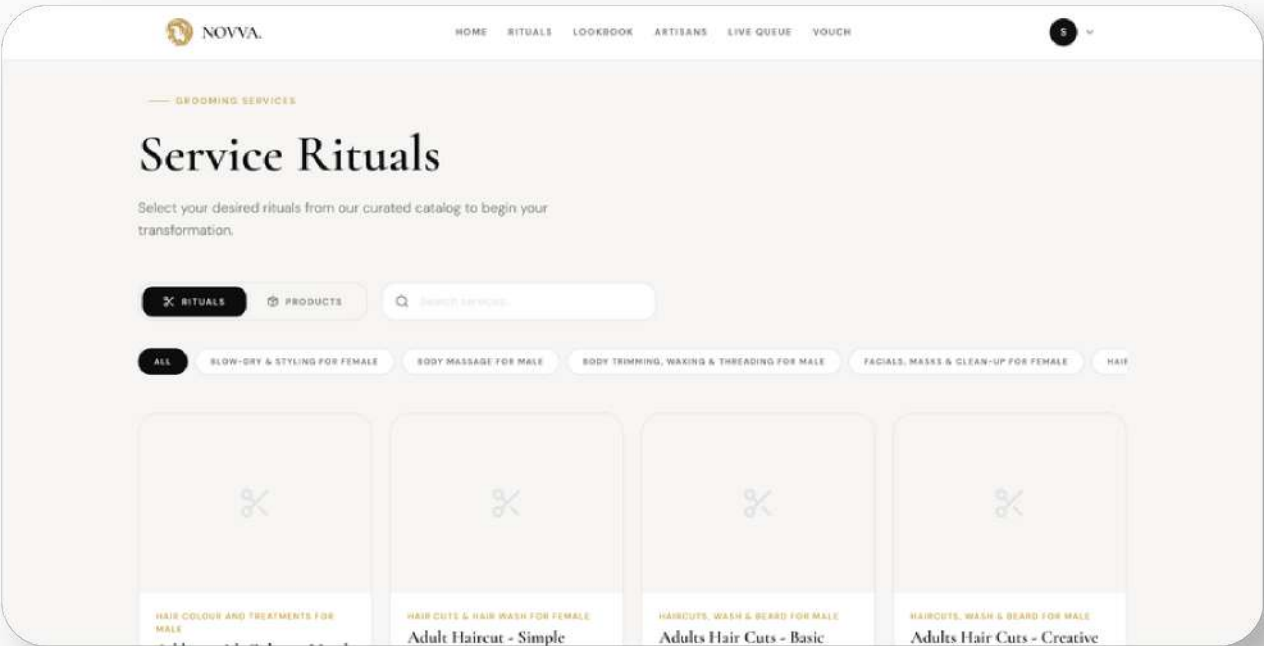

Identification

- Manual incident reporting
- Poor emergency coordination
- Limited resource visibility
- Lack of real-time monitoring

Solution

- Disaster Incident Reporting
- Emergency Response Tracking
- Resource Allocation & Role-Based Access
- Real-Time Monitoring & Analytics Dashboard

Improved disaster response through centralized coordination, real-time monitoring, and faster emergency management.

Novva Salon

Problem Statement: Managing appointments, staff attendance, salaries, and daily salon operations manually led to scheduling conflicts, administrative overhead, and limited business insights.

Identification

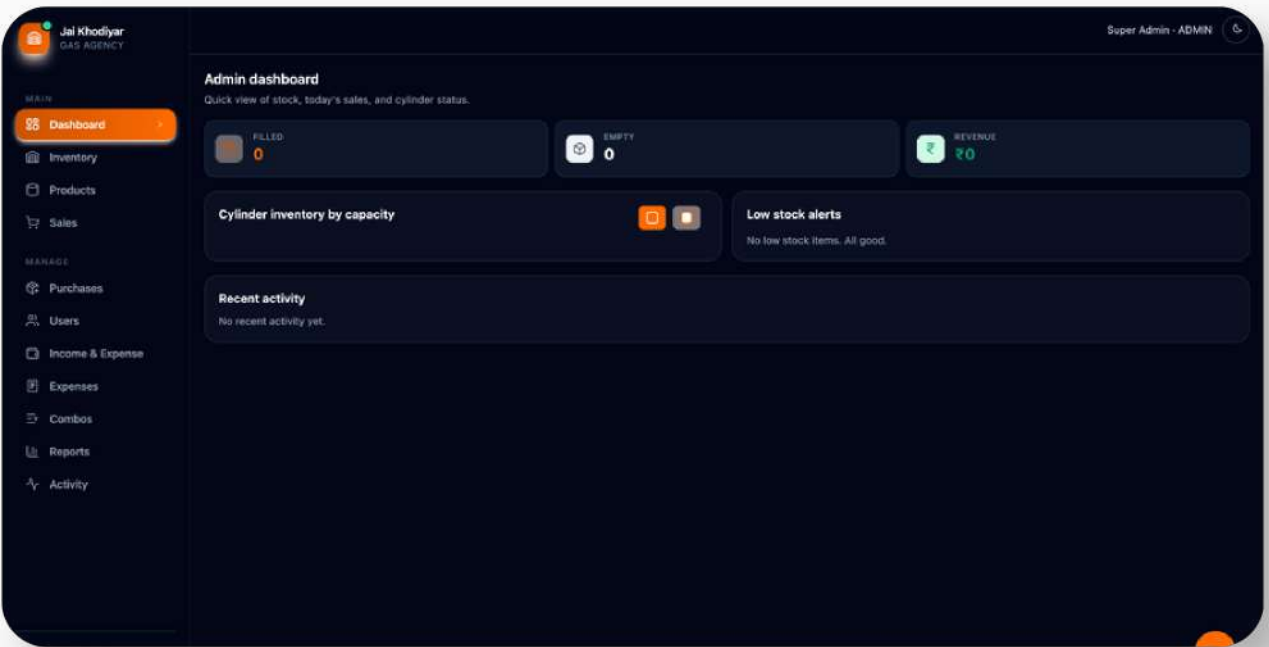

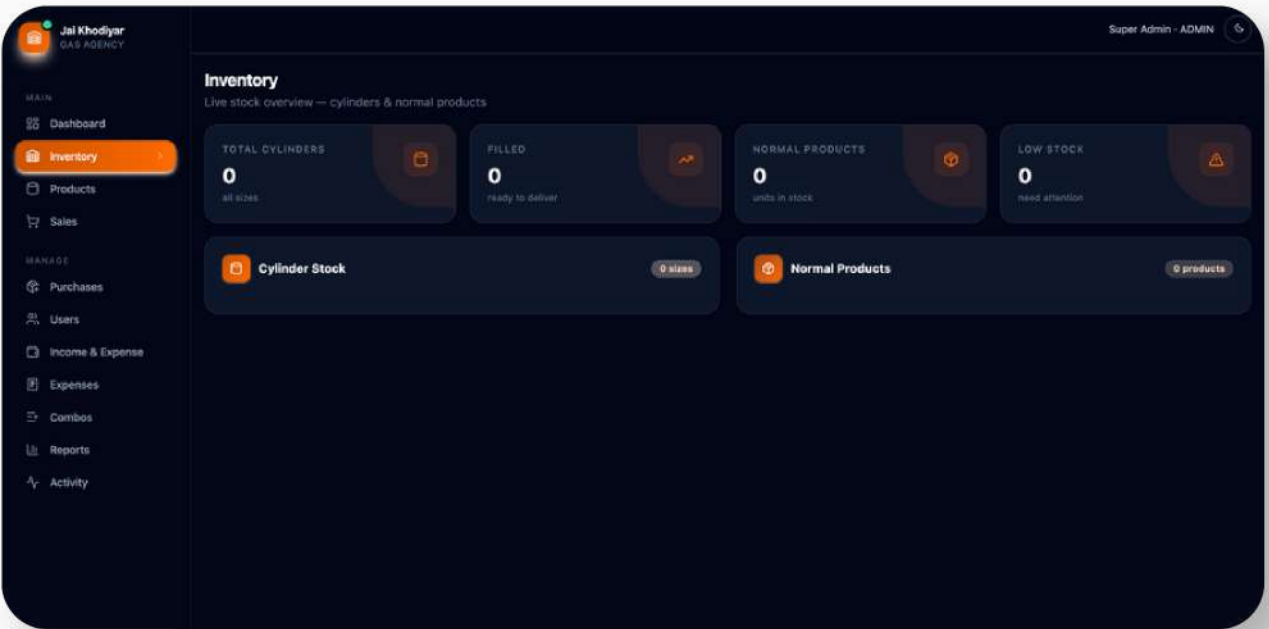

- Manual appointment management
- Difficult staff and attendance tracking
- Time-consuming salary management
- Limited operational analytics

Solution

- Customer Booking System
- Barber & Staff Management
- Attendance & Salary Management
- Analytics Dashboard

Automated salon operations, improved staff management, and enhanced customer service with streamlined workflows.

Gas Agency

Problem Statement: Managing gas inventory, purchases, and sales manually made it difficult to maintain stock accuracy, track transactions, and generate business insights.

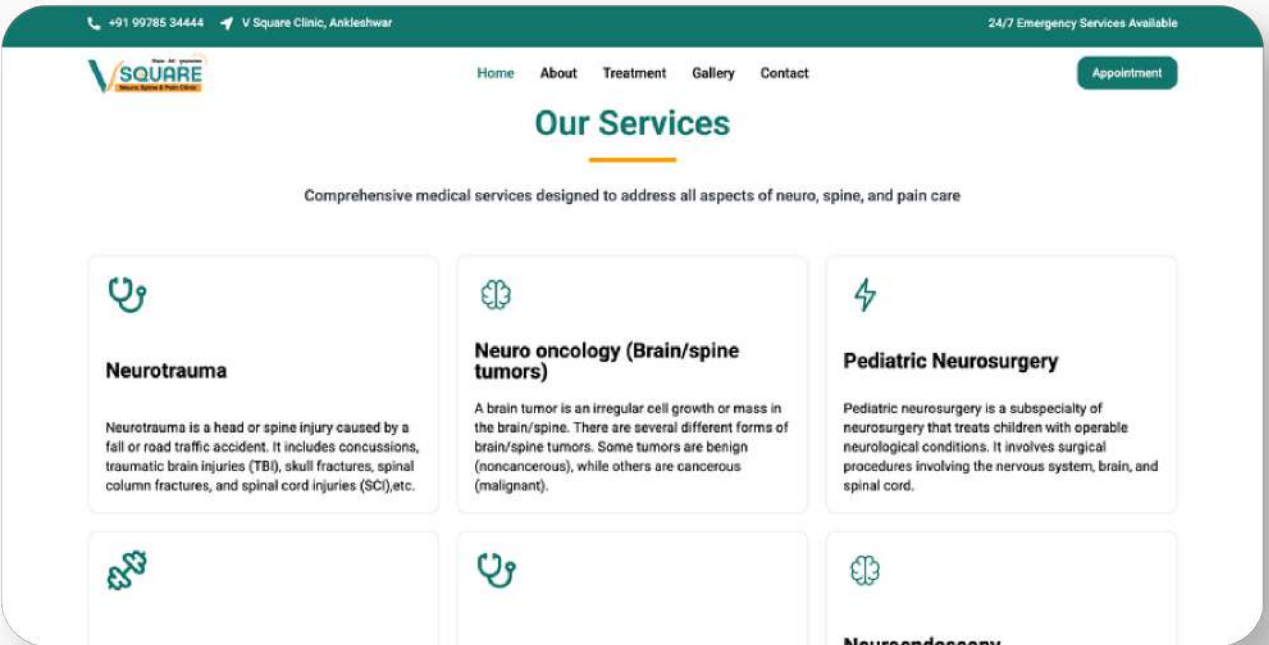

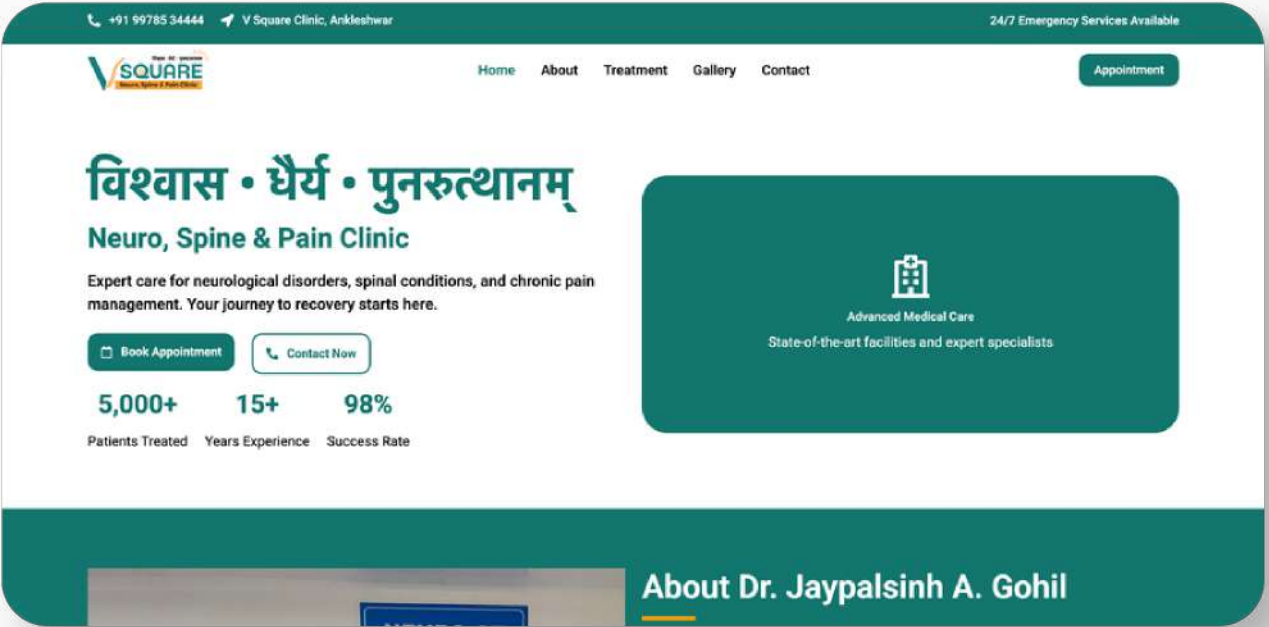

Identification

- Manual inventory tracking
- Difficult purchase and sales management
- Limited customer record management
- Lack of operational analytics

Solution

- Inventory Management
- Purchase & Sales Tracking
- Customer Records
- Analytics Dashboard

Improved inventory accuracy, streamlined operations, and enhanced business reporting.

V Square Neuro Spine Centre

Problem Statement: Patients faced difficulty accessing hospital information, doctor details, and consultation services through traditional communication channels.

Identification

- Limited online patient communication
- Manual appointment inquiries
- Difficult content management
- Low digital accessibility

Solution

- Doctor Profile Management
- Appointment Inquiry System
- Service & Hospital Information Pages
- Admin Content Management

Improved patient accessibility, communication, and the hospital's digital presence.

Dotted's

Problem Statement: Fashion businesses needed a centralized platform to manage products, inventory, and customer orders while providing a seamless online shopping experience.

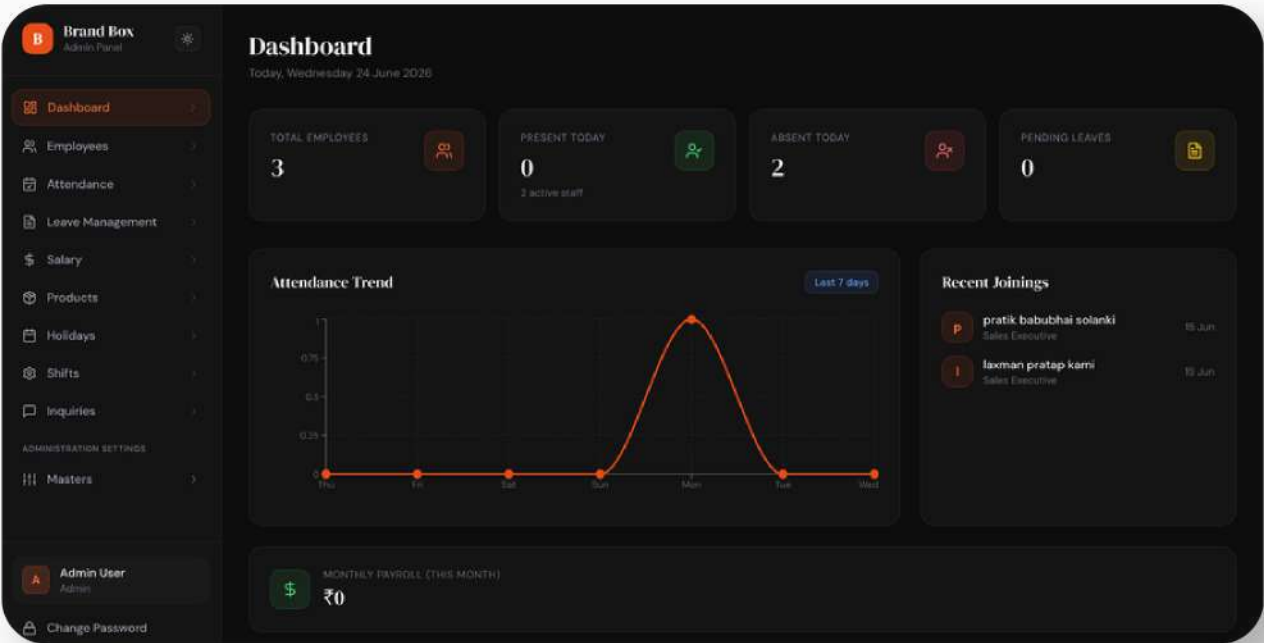

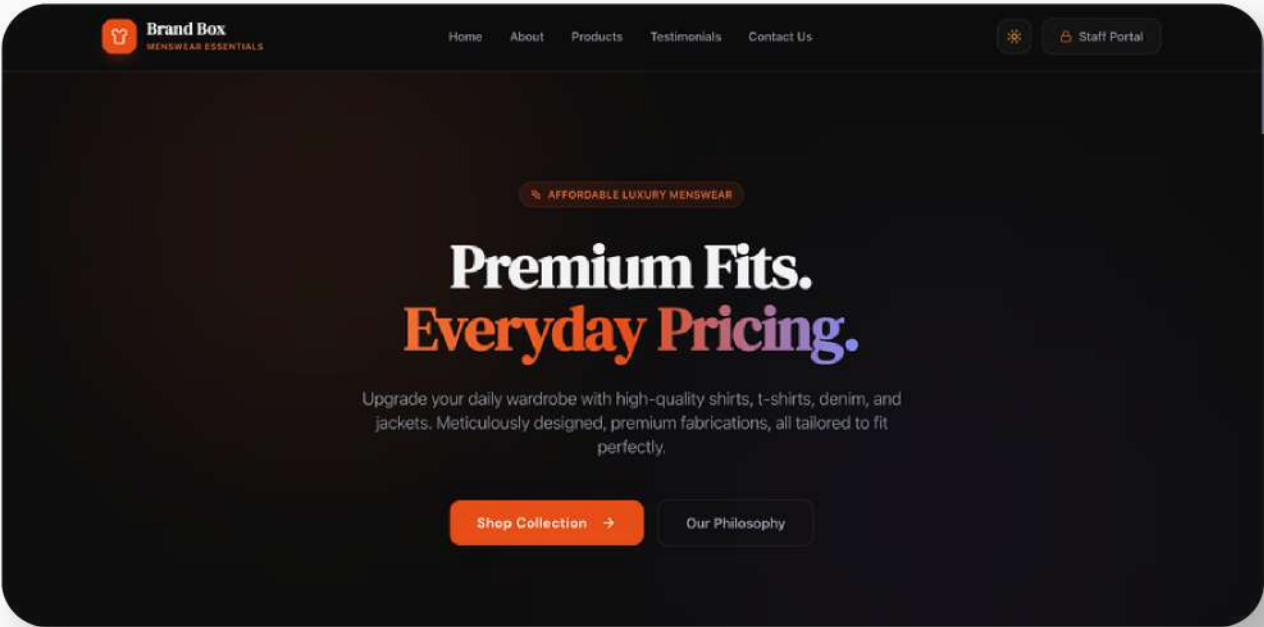

Identification

- Difficult product management
- Manual inventory tracking
- Inefficient order processing
- Limited customer shopping features

Solution

- Product & Category Management
- Shopping Cart & Wishlist
- Order Management
- Inventory Management

Streamlined online retail operations and improved the customer shopping experience.

BrandBox

Problem Statement: Managing employee attendance, leave, and workforce records manually increased administrative workload and reduced HR efficiency.

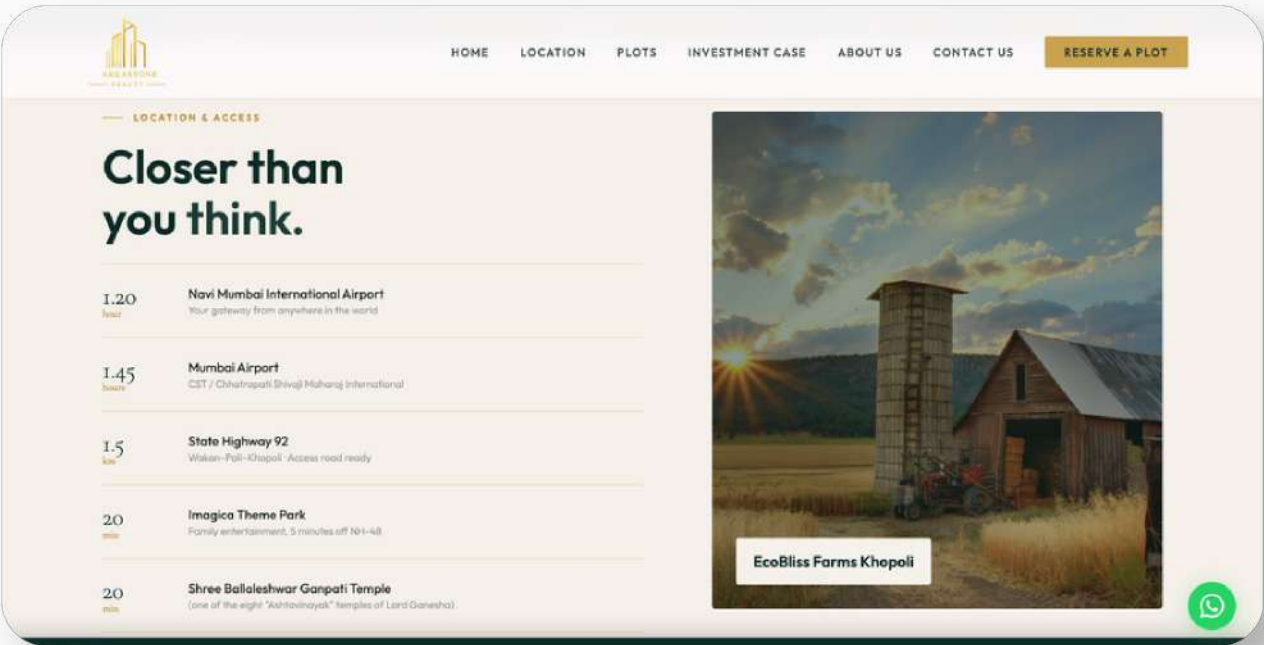

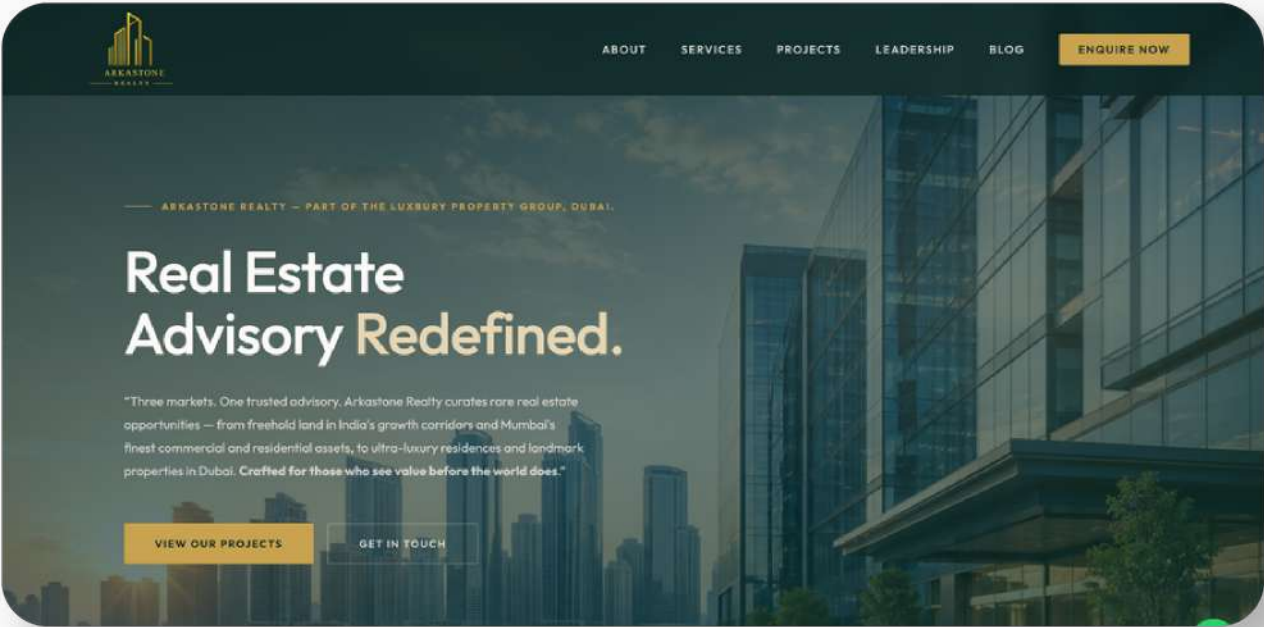

Identification

- Manual attendance tracking
- Difficult leave management
- Time-consuming payroll support
- Limited workforce insights

Solution

- Employee Management
- Attendance & Leave Management
- Payroll Support
- Analytics Dashboard

Simplified HR operations and improved workforce management through automation.

ArkA Stone Realty

Problem Statement: Managing property listings and customer inquiries manually reduced property visibility and slowed lead conversion.

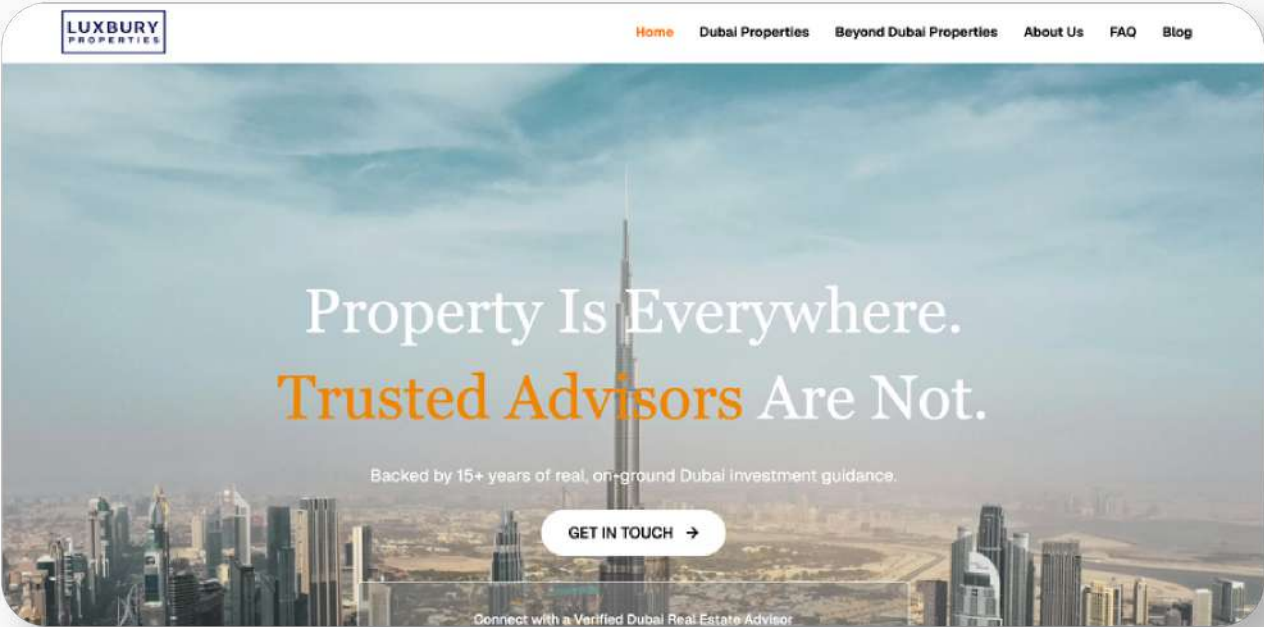

Identification

- Unorganized property listings
- Limited property search options
- Manual lead management
- Poor customer engagement

Solution

- Property Listing Management
- Search & Filtering
- Lead Inquiry Forms
- Contact Management System

Improved property discovery, lead generation, and customer engagement.

Luxbury Properties

Problem Statement: Luxury property businesses required a digital platform to showcase premium projects and efficiently manage investor inquiries.

Identification

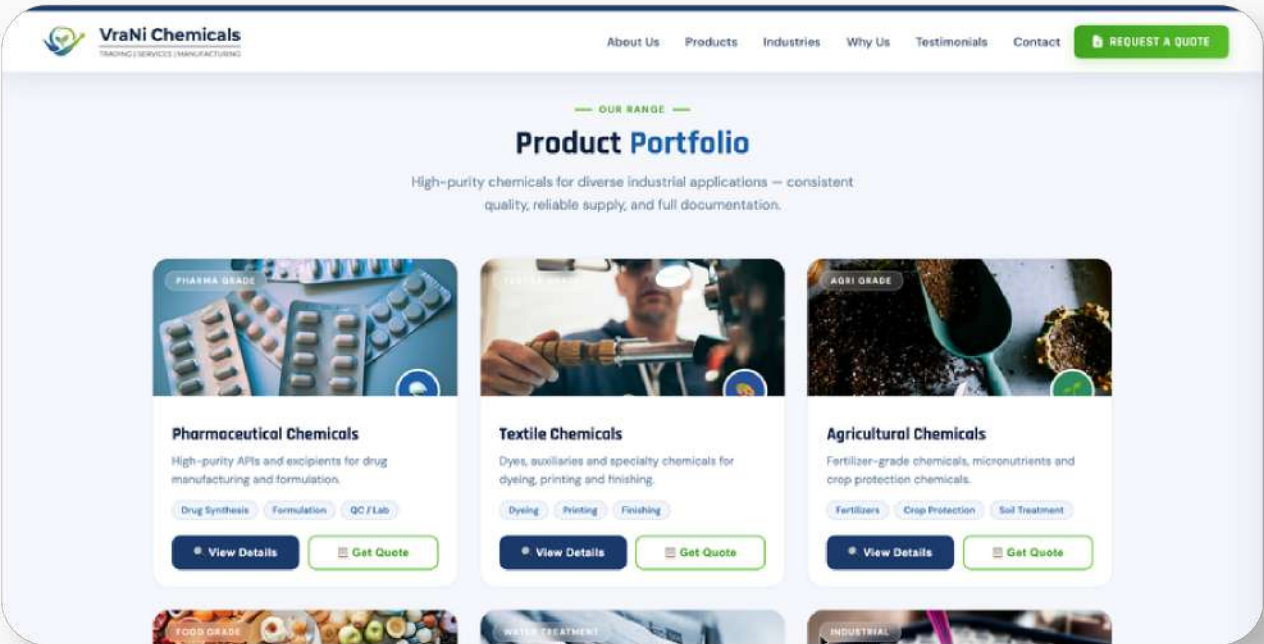

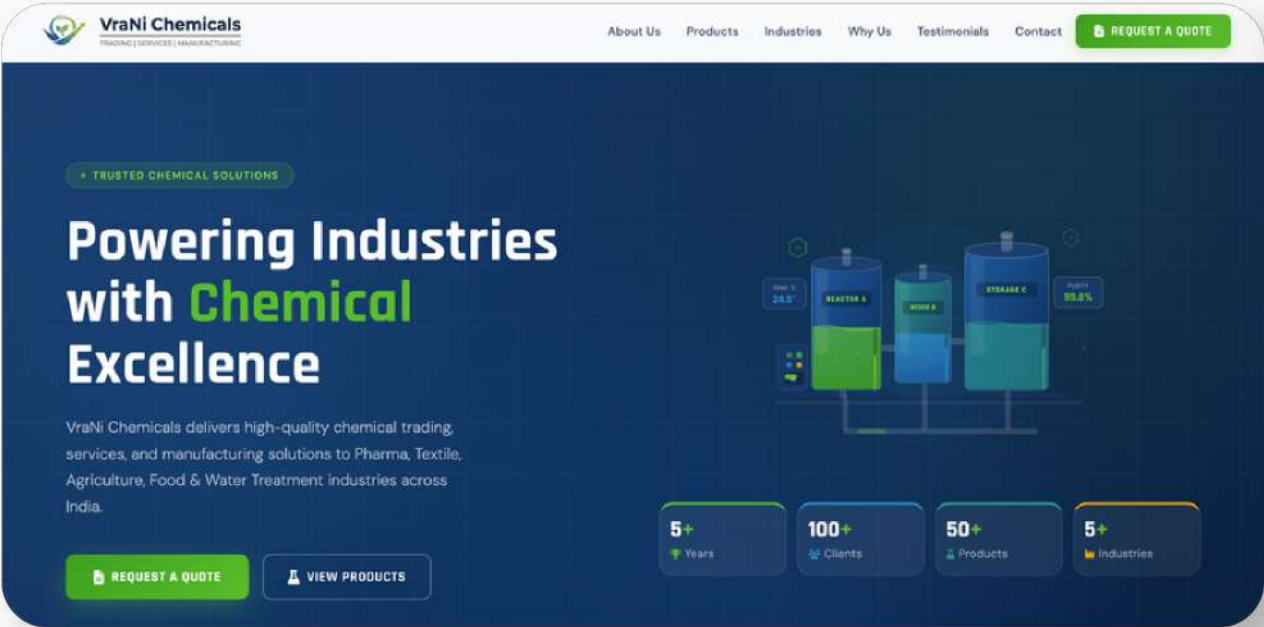

- Limited online property showcase
- Manual inquiry management
- Poor lead tracking
- Lack of centralized property management

Solution

- Property Portfolio Management
- Luxury Property Showcase
- Investment Inquiry System
- Admin Dashboard

Enhanced property visibility and generated quality leads from buyers and investors.

Vrani Chemicals

Problem Statement: The company lacked an effective digital platform to showcase products, manage content, and engage with potential customers online.

Identification

- Limited online presence
- Difficult product updates
- Manual testimonial management
- Inefficient customer inquiries

Solution

- Product Management Panel
- Testimonials Management
- Responsive Website
- Contact Management System

Strengthened brand visibility and simplified product and customer communication.
